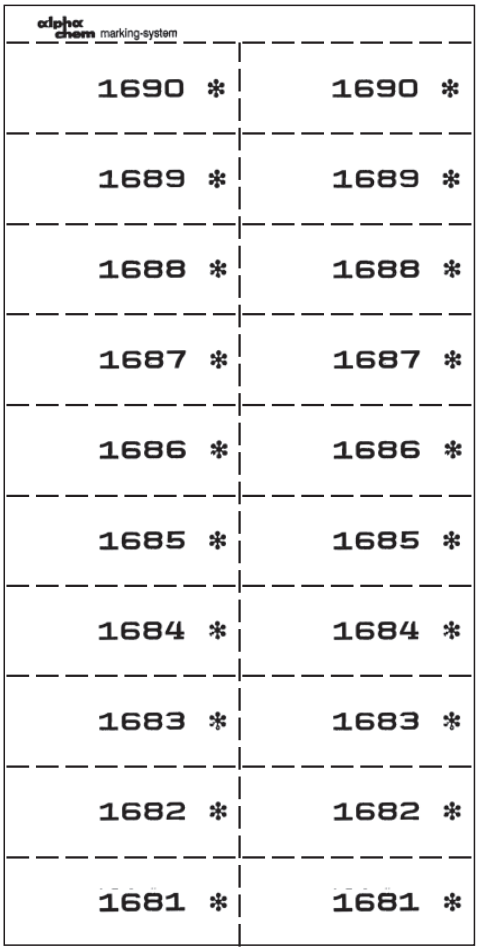
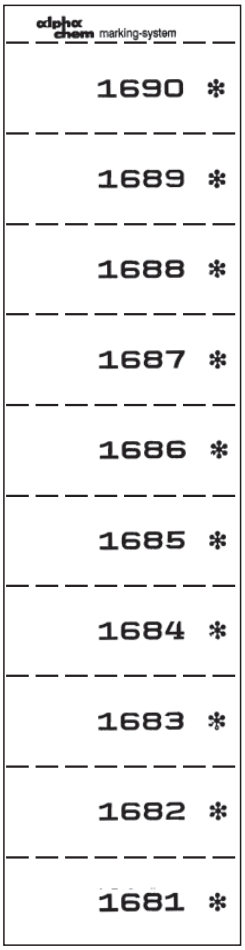
resp. 2x 1-10.000
and 3x 1-10.000



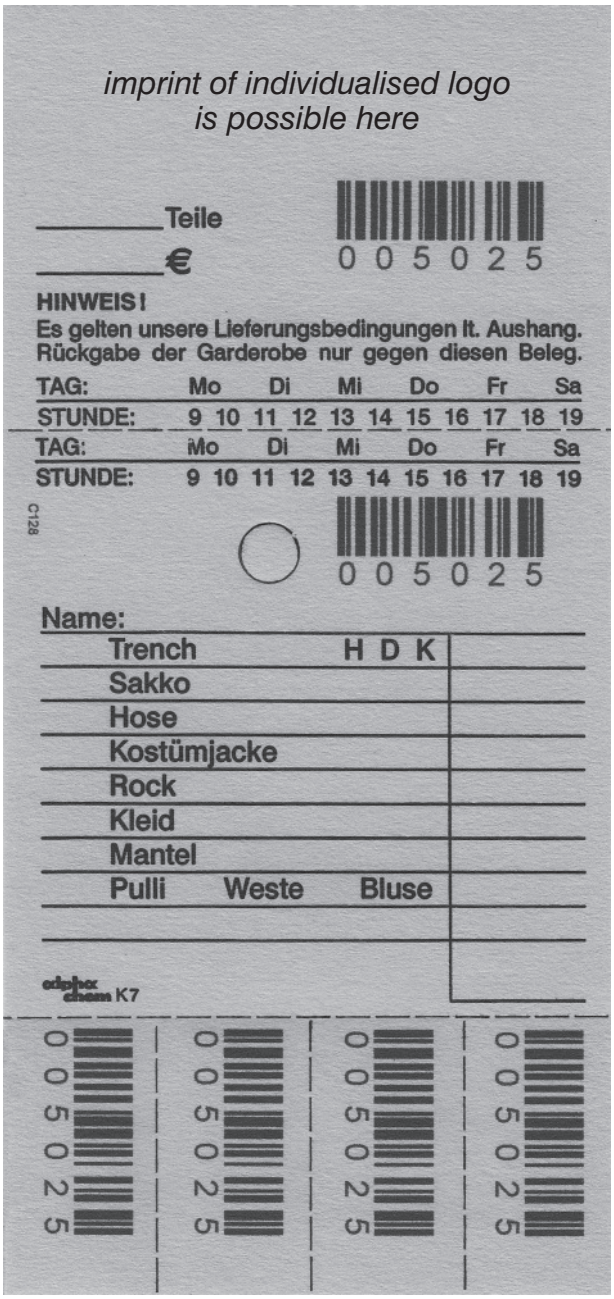


Barcode Forms

Digitalisation has long since stablished itself in all areas of dry-cleaning and laundry services. For safe and reliable registration of orders we are able to supply the following standard printed barcode forms:
K6L, K7, K70, K7SVP, W22 and HAS

Depending on the system used within your company or organization, we offer, dependent on the print from chosen, various barcode types, for example EAN 8, EAN 13, 2D, Interleaved 2 of 5 or Code 128.

According to the code-type selected, modifications to the printed form can be made to take into consideration sub-divisions for filial, delivery-route, branch-office, and sequential numbering, and other options.



sample: K7 Barcode type C128
